

# Entra ID Governance

Managing access rights across complex on-premises, cloud, and hybrid environments can be a daunting task. Pathway offers a comprehensive service leveraging Microsoft Entra ID Governance, a powerful tool that helps you **establish clear rules and automate access control for your organization**. Think of it as your organization's rulebook for who can access what, when, and under what circumstances.

## What our service can do for your business

### Entitlement Management

Our experts configure Entra ID Governance to automate access request workflows, assignments, reviews, and expirations. This simplifies access lifecycle management, saving you time and minimizing the risk of human error.

### Lifecycle Workflows

Pathway helps you design automated workflows for user onboarding, access changes, and offboarding. This ensures a smooth user experience and eliminates manual tasks associated with access management.

### AI-driven Access Reviews

We assist you in utilizing automated workflows for regular access reviews, ensuring only authorized users have access to critical resources.

### Privileged Identity Management (PIM)

Pathway implements PIM within Entra ID Governance to establish granular controls for privileged users. This minimizes the risk of unauthorized access to sensitive data and resources.
